NATURAL HISTORY STUDY FOR POLG DISEASE

Your experience can help shape the future of POLG care.

PIONEER is a natural history study — not a clinical trial.

No medicine is being tested.

You continue receiving your usual care from your own doctors.

WHAT IS PIONEER?

PIONEER is an international study that follows people living with POLG disease to better understand how the disease affects individuals and families over time.

WHY PARTICIPATE?

Understand POLG

Help researchers learn how POLG affects people differently.

Improve Future Treatments

Help researchers design better clinical trials and treatments.

Help Other Families

Your experience can help shape future POLG research and care.

WHO CAN TAKE PART?

People of any age with a diagnosis of POLG disease may be eligible.

You continue your regular care with your own doctors.

HOW CAN I LEARN MORE?

1

Talk to your doctor

Ask about PIONEER and whether you may be eligible.

2

Find a study site

Search “PIONEER POLG” on ClinicalTrials.gov to find a participating site near you or visit this link:
<https://clinicaltrials.gov/study/NCT07775872>

A GLOBAL STUDY 9+ countries | 20+ clinical sites | Up to 200 participants

Don't see a site near you? Contact us. New sites are being added.

Every participant brings us closer to better treatments and
a brighter future for the POLG community.

Thank you for being a pioneer.

THE POLG
FOUNDATION

In partnership with UMDF and
the global PIONEER study sites.
